## **Rio Grande Pool Liner and Gutter**

\$275,000 is requested to plan, design, construct and install a new gutter system, pool liner and decking at the Rio Grande Indoor Pool, which is located on the Rio Grande High School Campus and is owned and operated by Bernalillo County. The Rio Grande Indoor Pool is Bernalillo County's sole indoor pool facility and provides year-round aquatic activities for all ages including lap swimming, aerobics, open recreation and competitive swimming. Currently, the seams along the existing liner are separating, allowing water to leak and undermine the liner and possibly corrode the aluminum foundation. The gutter system is also clogging and not draining properly. This request would eliminate the existing leak and restore proper function to the gutter system, thereby ensuring continued visitor satisfaction at this aquatic facility.
